

## Drive Letter Assignments / Share Names

	<u>LOC'N</u>	<u>DESCRIPTION</u>	<u>SHARE</u>
A	CLIENT	Floppy disk drive (1)	n/a
B	CLIENT	Floppy disk drive (2)	n/a
C	CLIENT	Hard disk (1)	n/a
D	SERVER	DOS software directories	VARIOUS
E	SERVER	Training directories	TRAINING
F	SERVER	Available	
G	SERVER	Global data directories	WRLD_DAT
H	SERVER	Home data directories	*
I	SERVER	ASR reporting connection	**
J	SERVER	Department data directories	DEPT_DAT
K	SERVER	Database software directories	DBS_SFTW
L	SERVER	Available	
M	SERVER	Available	
N	SERVER	Available	
O	SERVER	Available	
P	SERVER	Programming software directories	PRG_SFT
Q	SERVER	Available	
R	SERVER	Miscellaneous software directories	MSC_SFTW
S	SERVER	General software directories	GEN_SFTW
T	SERVER	File transfer directory	FIL_TRAN
U	SERVER	Upload audit directory	PC_AUDIT
V	SERVER	Available	
W	SERVER	Available	
X	SERVER	Available	
Y	SERVER	Available	
Z	SERVER	Reserved, used by NETLOGIN	NETLOGIN

\* Share Variable is HOME\_DAT

\*\* Two shares exist:

1. ASR\_DEPT
2. ASR\_MNG\$

## Group Naming Conventions

This document specifies the conventions used in the creation of new groups, it does not explain how these groups are applied files and directories for security / software control purposes. For an understanding of how the groups are applied see document:

J:\BSD\PROJECTS\PCSYSTEM\DOCUMENT\DATA\_SEC.W61

All groups that are for software access purposes shall have the prefix SW\_, e.g. SW\_WP52.

All groups that are for data security purposes shall have the prefix DA\_, e.g. DA\_BSD

All groups that are for printer security purposes shall have the prefix PR\_, e.g. PR\_SECURE\_GILLS

All groups that are for access to DOS applications shall have the prefix LGDA\_, e.g. LGDA\_HPM

### Note

To aid sorting of groups, abbreviations for departments should be consistent and the practical application of this is illustrated in Appendix 1 which contains a list of group names already created.

## Appendix 1 List of Group Names

Group Accounts for \\GSEP21
