Apple iPhone and iPad

Change Default Browser App

Open **Settings**

Then scroll down to **DuckDuckGo**, then select it

Then select **Default Browser App**

Then select **DuckDuckGo**

Configure Browser Exit Behaviour

Start **DuckDuckGo**

Then select **Settings** (*the cog*)

Then select **Automatically Clear Data**

Select the following:

- **Automatically Clear Data**
- Action | **Clear Tabs and Data**
- Action | **App Exit Only**

Windows Desktop

Change Default Browser App

Open **Settings** (*the cog*)
Then select **Apps**

Select **Default apps**

Select **Web browser**
Then select **Brave**

The screenshot shows the Windows Settings application. It features a grid of settings categories, each with a green icon and a title. The categories are: System (Display, sound, notifications, power), Personalisation (Background, lock screen, colours), Gaming (Xbox Game Bar, captures, Game Mode), Update & Security (Windows Update, recovery, backup), Devices (Bluetooth, printers, mouse), Apps (Uninstall, defaults, optional features), and Ease of Access (Narrator, magnifier, high contrast).

- System**
Display, sound, notifications, power
- Personalisation**
Background, lock screen, colours
- Gaming**
Xbox Game Bar, captures, Game Mode
- Update & Security**
Windows Update, recovery, backup
- Devices**
Bluetooth, printers, mouse
- Apps**
Uninstall, defaults, optional features
- Ease of Access**
Narrator, magnifier, high contrast

The screenshot shows the 'Default apps' page in Windows Settings. At the top is a 'Home' button with a house icon and a search bar labeled 'Find a setting'. Below the search bar is the 'Apps' section, which is expanded to show a list of options: 'Apps & features' and 'Default apps'. The 'Default apps' option is highlighted with a green bar on the left.
